

Supply Duct from Transpired wall

Summer Bypass Duct w/damper

Direct Fire Modulating 400,000 BTU Make Up Air Unit

Gas line supply

Duct Sox Distributes Fresh Air

Transition Duct w/Sensor to "sense" delivered air temperature

Supply Dampers on intake open when wall is in use winter mode closed summer bypass

Supply Duct from Transpired Wall

Mixing Damper removing warm air near ceiling & tempering the incoming fresh air

How Systems are Integrated
